Student Information System 11/09/2018. Residence-based counts exclude out-of-district students. Capacities based on average class sizes of 25 and 27 (elementary and middle school respectively). Racial Diversity is calculated as the percent of non-white students, based on the Race/Ethnicity attribute in the SIS. Free/Reduced lunch numbers are estimates based upon eligibility in the NutriKids program. These are likely underestimates at Parkdale and Cascade Locks since program participation does not require applications. Special Education includes SPED students serviced in their home schools and TLC and SLC programs provided at specific locations. Includes students currently attending online programs.
